Hook & Ladder Co., and Chemical Engine respond to all boxes on First Alarm. On Third Alarm from boxes 28, 35, 36 and 37, Hose 1 will move up to Central Station

#### INSTRUCTION TO KEY-HOLDERS.

Upon the discovery of fire, go to the nearest box, open the same, and pull the hook down once only, then let go; listen, if the gong in the box strikes; if not, pull again. If you fail the second time, go to the next nearest box, and do the same.

Remain at the box, if possible, after giving an alarm, to direct the fireman to the fire. Do not give an alarm for a fire seen at a distance.

Be *sure* the box is *closed* before leaving it.

If you remove from your house or place of business, return the key to the Chief Engineer.

Key-holders will bear in mind that their key will be "trapped" when used, and will be returned to them by an Engineer.

Citizens are earnestly requested to keep themselves informed as to the location of keys to signal boxes. Signs over each box will give the desired information.

#### SIGNALS.

I—One blow for test at 6.50. A. M., and 6.50 P. M.

I—One blow for time signal at 12 M.

II—Two blows dismiss companies in waiting, and give notice that companies in service have “made up.”

Should an alarm occur from another box before this signal is given, companies answering second will answer on first, and companies answering third will answer on second.

If companies, responding to boxes 35, 36, 37 and 45 on second and third alarms, are wanted without apparatus, one round of the box will follow.

III—Three blows—second alarm.

III—III—Three blows twice—third alarm.

II-II—II-II—II-II—Twenty-two struck three times a 7.30 A. M., indicates no session of schools in the morning; same signal at 1.05 P. M., indicates no afternoon session.

IIII—Seven blows three times—Military Signal

I-IIII—One long and five short whistles—F. R. R. fire signal.

I-III—One long and three short whistles—C. M. R. R., Signal.

## DIRECTIONS FOR SOUNDING AN ALARM.

When a fire is discovered, go to the nearest box to the fire.

A sign over each box gives the location of the keys, with which the citizens should be familiar, thus saving any delay in sounding an alarm.

Open the box, pull the hook all the way down, once only, and let go. If you don't hear any sound from the tapper in the box, pull again. If you fail the second time, go to the next nearest box and do the same. Do not touch any other box if the first one gives the alarm.

After giving an alarm, remain at the box, if possible' to direct the fireman to the fire.

Never sound an alarm for a fire seen at a distance, unless assistance is called for.

Never open the box or touch the hook expect in case of fire.

Any one having a key to the signal boxes who should change his place of residence, or business, will please return the key promptly to the Chief Engineer or the Engine House.
